REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The arguments filed on 3/25/04 are persuasive as that the YAG laser and carbon dioxide lasers are not functionally equivalent in order to form via holes in the external copper foil. Accordingly, the rejection of the final office action mailed on 7/23/03 is withdrawn.

The prior art does not teach a process of manufacturing a printed circuit board including the process steps of forming via holes in external copper foil of a copper clad laminate by using a carbon dioxide laser, wherein the surface roughness of the external copper foil is 2.0 to 20 μm as defined in claim 1.

2. The closest prior art Shin et al JP-10075069A) teaches the use of a YAG laser to form a via hole in a copper clad laminate but fail to teach the introduction of carbon dioxide laser to the external copper foil of the laminate to form via holes as defined in claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
